## (54) DATA TRANSMITTER AND DATA TRANSMISSION METHOD

### (57)Abstract:

**PROBLEM TO BE SOLVED:** To provide a data transmitter and a data transmission method by which the interference with users other is minimized, when retransmitting transmission data.

**SOLUTION:** A parity bit production part 110 produces an FEC parity bit from the transmission data for correcting an error. A transmission power decision part 111 decides the transmission power of a parity bit retransmission mode from the number of bits of information bit of transmission data and of parity bit. A transmission power control part 112 controls the transmission power, according to the information that is decided at the part 111 and outputs the controlled transmission power to a transmission radio part 104.
